

# Managed and Monitored Hosting for Orderwise

Ridgeon Network provides fully managed and monitored hosting environments designed specifically for Orderwise's powerful ERP and Warehouse management system. Our hosting solutions provide the performance, reliability and security your business needs, backed up by proactive UK-based support and technical expertise.

We'll work closely with you to ensure your Orderwise deployment is sized, configured, maintained and optimised for the specific needs of your business. From initial setup to ongoing monitoring and support, our team keeps your Orderwise business operations working smoothly – so you can focus on what you do best.

## Key features and benefits

### Orderwise ERP-ready hosting

Unlike some other hosting providers, Ridgeon Network offers hosting environments tailored for Orderwise. Whether you're running a single-server setup or multi-site ERP deployment, we'll configure and manage everything to your specific requirements.

### Built for performance and reliability

Built on industry-leading virtualisation and private cloud technology, our infrastructure keeps Orderwise running smoothly and securely even under heavy loads.

### Secure, UK-based data centres

Your data is stored in UK-based, ISO 9001 and ISO 27001 certified data centres. All solutions are fully compliant with Cyber Essentials and GDPR, and as part of the setup process we'll implement custom firewall and security controls such as secure VPN, Multi-factor authentication/2FA and IP whitelisting.

### Comprehensive management and monitoring

We'll take care of everything from server setup and security patching to application-level monitoring. Our 24/7 monitoring means we stay vigilant and ready to identify and resolve issues before they affect your users.

### No hardware needed

Don't worry about managing or updating any hardware, we handle everything for you and run your servers across high-availability clusters to provide resilience against failure and hardware maintenance.

## Why choose Ridgeon Network?

When you choose Ridgeon Network, you get more than just a hosting provider. You gain a specialist partner who fully understands the critical role Orderwise plays. We'll make sure your solution is secure, reliable and optimised to your needs, giving you peace of mind in running your business.
